# MinimServer

MinimServer is one of the best UPnP Audio Server. MinimServer collects user's musics intelligently and operates with DLNA control point such as Bubble UPNP. You can search and playback your music files more convenient.

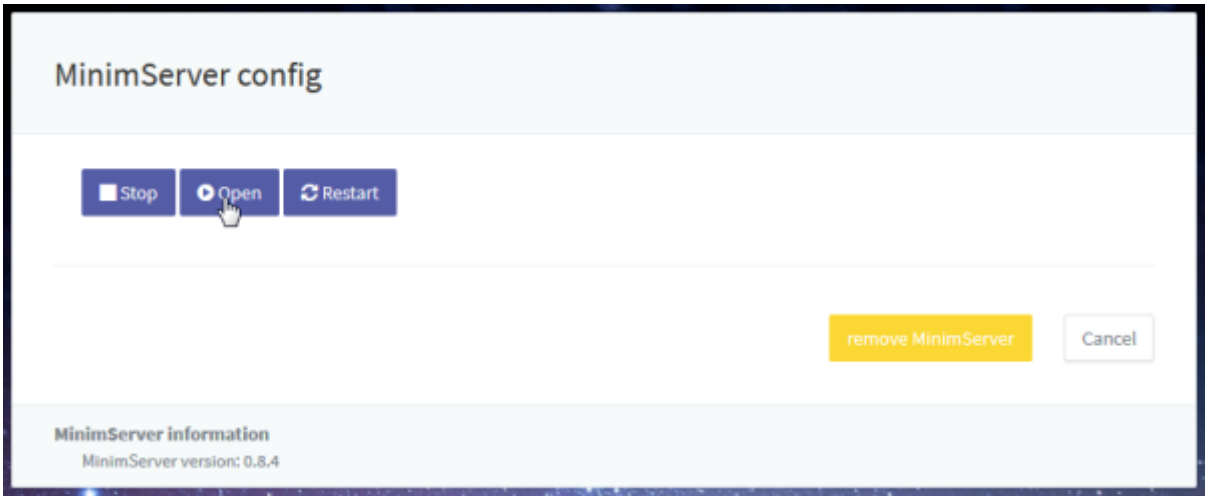

MinimServer should be installed by user. Installation is available in MinimServer config page.

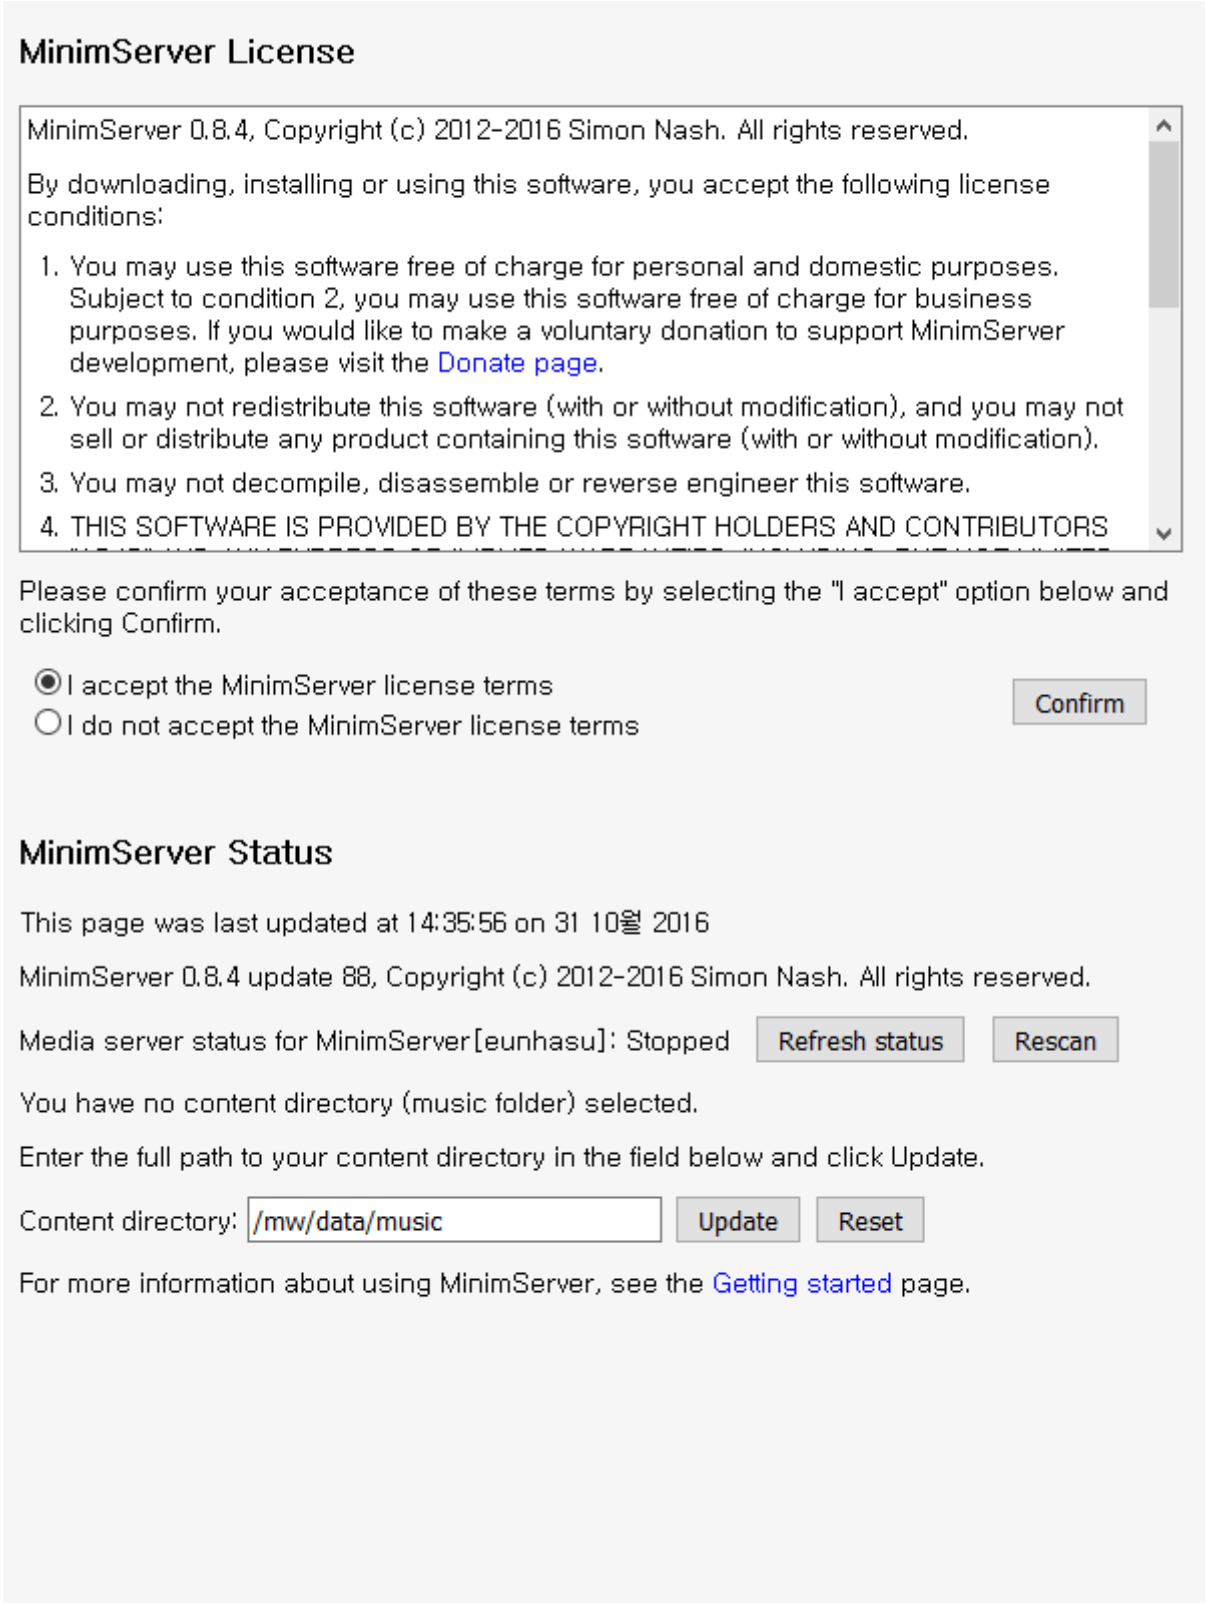

MinimServer can be controlled in MinimServer config such as start, open, stop or restart after installation done.

Content directory of MinimServer setting has to be set in MinimServer config page which could be open after start MinimServer.

First to use, you have to accept MinimServer license terms.

MinimServer Status

This page was last updated at 14:35:56 on 31 10월 2016

MinimServer 0.8.4 update 88, Copyright (c) 2012-2016 Simon Nash. All rights reserved.

Media server status for MinimServer[eunhasu]: Stopped Refresh status Rescan

You have no content directory (music folder) selected.

Enter the full path to your content directory in the field below and click Update.

Content directory: /mw/data/music Update Reset

For more information about using MinimServer, see the Getting started page.

- Content directory shoule be /mw/data/music to collect musics in Eunhasu system.
- If /mw/data/music space were 100% full, main system would be abnormal states and not be operated normally.
